

Communicable Diseases/School Guidelines

School Health Services fall under the guidelines of the Texas Department of State Health Services. These communicable disease guidelines are followed to prevent the spread of communicable diseases in a public school.

Children with illnesses such as fever (100.0 or over), strep throat, vomiting, diarrhea or pink eye (conjunctivitis) should not be sent to school, until symptom free for 24 hours (un-medicated) and/or on antibiotics for 24 hours respectively.

Each student's attendance is important to everyone involved.

Thank You in advance for helping maintain a healthy environment for students and staff.
