

Inclement Weather Procedures Scurry-Rosser ISD

When bad weather is predicted, administrators pay close attention to forecasts, stay in close contact and work in coordination to make the best decision for the safety and security of students and staff.

Before the school day: The decision to cancel or delay a school day will be made by the district administration as early as possible and communicated by the district and news outlets in the area.

During the school day: If a significant weather event occurs while school is in session, district administrators will take appropriate action as needed to ensure the safety of students and staff.

Weather and road conditions can vary greatly in some areas. As a result, **parents are the ultimate decision-makers** on whether or not their students will attend school. Parents need to notify the school office if their student will not be in school or if they should be dismissed early due to weather conditions.

Communication: During bad weather situations, Scurry-Rosser ISD will use the following communication channels *if there are any changes* to the district schedule: the district's mass email and text messaging notification system, social media accounts, and DFW radio and TV news outlets.

Snow, Sleet and Ice: During these types of weather events, district administrators observe road conditions and other related information to determine if unsafe conditions exist. If it is necessary to delay the opening or close school, the district will notify the public by 5:30 am, if possible. If winter weather conditions worsen during the school day, the district determines if an early release is needed to get the students home sooner and bus drivers back to the bus headquarters safely prior to darkness.

Bad Weather Makeup Days

Scurry-Rosser ISD designates two bad weather days on the district calendar. If the district closes due to weather, those days can be used to make up missed school and work.
